

## 3-bed shapers are fully compatible with plastic mulch application

A unique feature of Model 6331 is adjustable bed tops - or - adjustable furrows. Bed top width can be sized for proper plastic mulch application. Furrows can be wider for walking or as narrow as 18" to maximize bed top area or for an effective guidance system for cultivating equipment. Furrows narrower than 18" are custom-order.

This mid-power design for tractors up to 125 HP is progressive, versatile and affordable for smaller wholesale growers or larger fresh market growers wanting to move up from 1-bed equipment.

## Options

Use GPS for row alignment or add hydraulic markers. Markers feature an automatic sequence valve, which uses one hydraulic outlet. All hoses included.

Shown with optional open-center hitch. 5 x 5 hitch beam can be partial or full-width.

## Drip tape application

Our full line of premium Drip Tape Applicators offer many choices for drip tape placement before or after planting. Roll supports include automatic roll brakes.

Also available is Model 8421, built for big acres on tractors up to 170 HP. Bed width, bed height and furrow width are made-to-order.
