

Models 5101 and 5201 are heavy-duty Disk Bedders for 45 to 80 PTO-HP tractors. Many attachments are available for the most progressive raised bed systems.

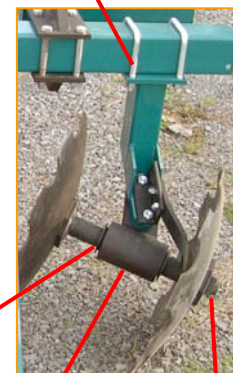

Like the smaller models, choose from single or multi-toolbar features. Category-2 hitch pins or the common 4" toolbar on the 5101 may be preferred over the 3101.

5201 has gauge wheels and toolbar space to set-up high-performance equipment larger growers may expect.

An impressive line-up of Multi-Tool Kits are available for 5201 to set-up a Chisel Plow, Ripper, Bed Lifter or Mulch Lifter.

Adjustable on toolbar

Two sealed ball bearings

6" wide housing

1-1/2" round arbor

### **Models 5101 and 5201**

- 80 PTO-HP rating
- Category 2 hitch - quick-hitch compatible
- Four 24" disks on two gangs
- Model 5101 features a single 4" square toolbar, 84" wide
- Model 5201 features three 4" square toolbars, 84" wide, with gauge wheels for depth control
- Adjustable 54-72" bed C-C width

**Options - Page 1-5**

**Multi-Tool Kits -- Page 1-6**

### **Horsepower requirement**

Minimum 45 PTO-HP in loose soil. Tractor needs Category-2 3-point hitch. If adding ripper shanks, allow 25 PTO-HP for disk gangs.

**5201 shown with Ripper Shanks, Leveling Bar and Drip Tape Applicator Options**
