30311 Leveling Bar Asby

for 3101 - 3201

40311 Leveling Bar Asby

for 5101 - 5201

A Leveling Bar leaves a more-level finish, helps crumble soil on the bed top and/or knocks bed down to a consistent bed height. Example on Page 1-1.

30329 Leveling Pan Asby

for 3101

40329 Leveling Pan Asby

for 5101

A Leveling Pan can leave a smoother bed top. The flat pan surface also provides depth control of disk gangs, which is adjustable.

30762-48 Rolling Basket

for 3101 - 3201

40762-48 Rolling Basket

for 5101 - 5201

The Rolling Basket provides more-aggressive crumbling action for a seedbed. For conservation bedding methods, this also allows residue to pass through as bed is firmed.

Disk Blades

for any model

- 17237 Disk Blade, 16" Notched
- 17741 Disk Blade, 18" Notched
- 14677 Disk Blade, 20" Notched
- 15046 Disk Blade, 22" Notched
- 18044 Disk Blade, 24" Notched
- 18549 Disk Blade, 26" Notched

Mix-and-match blade sizes to alter shape of bed. Photo shows 26"

and 18" blades forming a narrower bed crown between wider furrows.

40455 Ripper Shank Asby

18589 Ripper Point

for 5201

Ripper shanks fracture soil ahead of disk blades as wanted for penetration. Also install middle shank to fracture root zone.

Maximum three shanks on this hitch and toolbar. Two or three middle shanks are possible - please inquire. This 1-1/4 x 4 shank has 25 HP rating.

20620 Sub-Toolbar Pkg

for 3361

25620 Sub-Toolbar Pkg

for 5361

Drip Tape Applicator

see Page 7-1 for a full description of applicator models

Install a single tape line, centered or off-center. Since higher beds tend to have narrower bed tops, usually one tape line is used for two rows. If you have any special application - please inquire.
