

MODEL 2514-R

ROW CROP BED SHAPER

2514-R

Rolling soil action

S-tines loosen soil in front of shaper pan without disturbing row crops. Soil rolls and re-firms under pan and buries weeds.

Crop shields

Many cultivating attachments available to customize

Precision cultivation ... with simplicity

This rugged, versatile bed shaper cultivates row crops and lightly re-finishes the bed top. With depth control on the shaper pan, little adjustment is needed for a fine cultivation and re-shaping of beds and furrows. Also use to shape or cultivate beds before planting with additional attachments.

Category-1 and Category-2 models available for 35-80 HP tractors. Price tends to run about \$1000 more than cultivators without a shaper pan.

Three-bed models are made-to-order

Bolt-in center pan(s) to shape new beds. Sectional shaper pans are available in 1-inch increments to match your system

Loosen compaction in furrows. Shanks have shear-bolt safety feature

Adjustable 6", 9" or 12" row gap standard

Specify bed height - most units are for 4-8" beds
