

3 Stationary, hand-crank winder

1008

HandyWinder™

Efficient & economical

This is a simple, economical winder to roll-up plastic mulch or drip tape with muscle power. First, material needs to be loose and laying on top. Then use the HandyWinder™ to pull material from end of field and wind-up easy-to-carry bundles. This alone is a great improvement to roll up up an acre or two without dragging materials into a big, messy pile.

Two basic packages of Model 1008 are offered below. Otherwise, many components are available to customize.

Mount to any Lifter or toolbar

Horizontal mounting also available.

Mount to your truck

#18282 Toolbar Pkg
for 2" square Hitch Receiver

Add a hand-crank to your drip tape applicator

#16684 Hand
Crank Winder
Conversion Pkg.
Get additional use
from tape applicator
post and shaft.

Wind-up plastic mulch or drip tape for disposal

1008-PKGA -- includes (1) Separating Spool

Remove half spool and pull
off material bundle

CLAMPS: Both packages include clamp for vertical mounting on 2" square toolbar. Many clamps are available to match other toolbars.

Wind-up drip tape for re-use

1008-PKGB -- includes (5) 18 x 12 Storage Spools

Easy-on, easy-off
spool drivers
positively engage
spool to shaft

Guide material by
hand for even
winding.

Storage spools save tape for re-use or move grids of drip lines during irrigation season. Spool can then be mounted on drip tape applicator.
