

MODEL 1716 / 1816

WATER WHEEL PLANTER

1816

See page 16
for water wheel specs

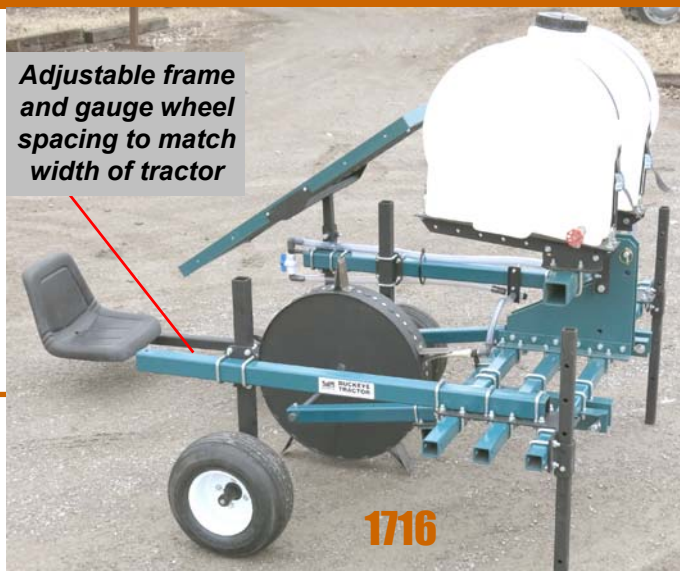

Junior

model for compact tractors

Versatile small-farm planter

Utilize a Water Wheel Planter on expanding fresh-market farms to rapidly improve planting speed and efficiency - get off your feet! Plant cells or seeds. Maybe pots. A tractor that crawls less than 1 MPH is needed.

- 65 gal tank
- 1 to 3 water wheels
- Maximum 24" row spacing (36" optional)
- Category-1 hitch
- Approx 1500 tractor lift capacity needed

Adjustable frame
and gauge wheel
spacing to match
width of tractor

1716

Model 1716 is the same planter with one seat and one rack. On the smallest farms, multiple passes plants multiple rows on one bed
